Internet  
Connection

# INTERNET USAGE GUIDE

Revised 06/19/18

# Introduction

Your building is being supplied with Internet connectivity. We hope you will enjoy the “always-on” Internet connection. This connectivity is not meant to facilitate the downloading of large files or the playing of low latency Internet games. It is intended to provide Internet access speeds that will vary with usage but overall be faster and more convenient than using a dial-up connection. Not all services/programs are compatible with the service. If you have a specific program you would like to use it is your responsibility to inquire if it will function properly.

## Hardware / Software Requirements

A computer with an Ethernet port or a wireless router to connect to the supplied Ethernet jack in the bedroom of your apartment. The connectivity in each apartment is Ethernet based, if you require wireless you must supply your own router. **If your router has a coax port or includes a modem of any type it is not compatible with the service and should be replaced.** Only Ethernet based routers/switches, etc are compatible with the service.

## **Networking Setup**

The operating system needs to be configured to assign an address to the card using DHCP. DHCP allows the network to automatically assign an IP Address.

If you are using a computer attached directly to the Ethernet outlet, the default settings will get you connected. If you have changed any of your settings you must select the option to receive your network settings automatically (via DHCP).

If you are configuring a router, the default setting should be to get its settings automatically (via DHCP). Further assistance with router settings should be obtained from the manufacturer of the device.

Additionally, we recommend that you turn off file and printer sharing and all Internet based services on your computer. This will prevent conflicts with other computers on the network and secure your files from other network users.

The only hardware necessary to share this connection among multiple computers is a switch or hub. A router can be used, but you must ensure that the Modem or WAN port is the only port connected to the Ethernet outlet, not one of the numbered LAN ports.

## **E-Mail Setup**

We do not offer E-Mail accounts, however, we do allow for outbound and inbound e-mail access via SUBMISSION, POP and IMAP.

## **Security**

The apartment building's LAN is behind a firewall which allows Internet communication only when initiated from within the LAN. This allows you to connect to web sites, mail servers, etc but prevents anyone from connecting to you. You, however, are still responsible for the security of your own computer system. The aforementioned security measure precludes the use of any software that requires an open incoming connection from the Internet, examples of such software can be found at the end of this guide.

As you are on a LAN, there is no restriction on traffic between computers within the same rental complex. We strongly suggest turning off all file and printer sharing and any Internet services you may have running on your system. These include Web Server, FTP Server, SMTP Servers, etc. Refer to your operating systems documentation on methods to turn off these systems.

## Routers / Wireless Routers

If you are connecting a router or a wireless router only connect the Internet or WAN port to the network. **DO NOT CONNECT THE NUMBERED PORTS TO THE NETWORK.** Every semester there are connectivity problems at our buildings due to the improper connection and or setup of a router / wireless router. **If we find you are causing this type of disruption we will charge you a \$45.00 fee.**

## File Sharing/P2P software

Due to complaints received from the Motion Picture Association of America regarding Copyright infringement, there is to be no use of File Sharing or P2P software on the network. **Anyone found violating this policy will be subject to disconnection as well as a \$45.00 fee.** Ignorance of this policy or the software running on individual PC's will not be accepted as an excuse. If there is any question as to whether or not you are running file sharing/P2P software you should consult with professionals to ensure that no such software is running on your PC. (See pg 11 for a partial list of software to avoid.)

## World of Warcraft

The Blizzard Downloader uses BitTorrent to facilitate the downloading of patches by default. The use of BitTorrent or any P2P software is strictly prohibited on the network, therefore you must follow the directions at the following URL to disable the use of P2P: **<http://www.worldofwarcraft.com/info/faq/blizzarddownloader.html>**

## Virus Detection/Prevention

It is the responsibility of every Ethernet user to ensure their computer is virus free. Antivirus software is widely available for most operating systems, and is freely available to Staff and Students at U of M from the following URL: **<http://www.itd.umich.edu/virusbusters/> . Due to the increasing number of problems associated with infected computers we will assess charges against users that fail to protect their PC from viruses and cause interference with other users or our network.**

## Network Unavailability

Although we will strive to maintain the best connectivity within our buildings, we cannot be responsible for downtime due to our Internet service provider. We will work closely with them, however, to ensure reasonably fast continuation of service. Accordingly, **there will not be any rebates for service interruptions.**

# Usage Rules and Regulations

- Do not use static IP Addresses.
- Do not run a DHCP Server.
- Do not run any P2P Software (see pg 9.) that will cause inordinate drains on bandwidth, which violates section B of this guide below.
- The Landlord and College Internet Connections, LLC, hereinafter referred to collectively as “Landlord” exercise no control whatsoever over the content of the information passing through the network. You are fully responsible for the privacy of, content of, and liability resulting from your own communications.
- Landlord makes no warranties of any kind, whether expressed or implied, for the service it is providing. Landlord also disclaims any warranty of merchantability or fitness for any particular purpose. Landlord will not be responsible for any damages consequential or incidental that you suffer or inflict on others. This includes but is not limited to loss resulting from computer viruses, delays, non-deliveries, mis-deliveries, or service interruptions caused by Landlord or your errors or omissions. Use of any information obtained via Landlord’s networks is at your own risk. Landlord specifically denies any responsibilities for the accuracy or quality of information obtained through its service.
- You agree not to interfere with or disrupt other network users’ network services or network equipment, intentionally or not. Disruptions include, but are not limited to, distribution of unsolicited advertising or chain letters, violations of Usenet news etiquette, propagation of computer worms or viruses, and using the network to make unauthorized entry into any other machine accessible via the network, or for the commission of any crime.

**Resident agrees that the use of the Service by the Resident is subject to the following terms and conditions:**

- a) **Landlord may determine permissible uses of Service** - Landlord reserves the rights to determine at its sole discretion what uses of the Service are and are not permissible.
- b) **No uses that inordinately drain bandwidth** – Any use of the Service that inordinately drains bandwidth, such as hosting one or more web sites and/or running one or more servers directly from the Apartment, is prohibited. Resident may have a Web site or e-mail address that is hosted over third-party servers, like America Online, and that is stored at a site not on the premises of the Apartment Community. Neither Landlord nor Provider will provide e-mail servicing.
- c) **No rent abatement for service disruptions** – Landlord shall in no way be liable or responsible for any loss, damage, or expense that Resident may sustain or incur by reason of any change, failure, interference, disruption or defect in the supply or character of the Service or if the quantity of the Service supplied by the Provider is no longer available or suitable for Resident’s requirements, and no such change, failure, interference, disruption, defect, unavailability, or unsuitability shall constitute an actual or constructive eviction in whole or in part, or in any way entitle Resident to any abatement or diminution of rent or in anyway relieve Resident from any obligation under their residential lease.
- d) **Landlord’s right to discontinue service** – Landlord reserves the right to switch Providers and/or discontinue providing the Service to an apartment if the apartment is deemed to be using an inordinate amount of bandwidth as stated in section b above.
- e) **Access to apartment** – To provide the Service, certain equipment, including amplifiers, distribution cables, lock boxes, connectors, splitters, wall plates, and other appurtenant devices will have to be installed or are installed in Resident’s Apartment. Resident shall allow Landlord and/or Provider service personnel reasonable access to the Apartment for purposes of installing, maintaining, repairing, replacing, or removing this equipment, as well as for auditing, selling or changing the Service.
- f) **Resident responsible for equipment damage** – Resident agrees not to damage the equipment described in subsection “e” above, and agrees to indemnify and hold Landlord harmless from and against any and all claims, demands, costs, expenses (including attorney’s fees), and causes of action arising out of, or in any way relating to, actions or inactions by Resident, including but not limited to, any amounts required to cover the costs of any such damage.

- g) **No installation of private reception devices that cause interference** – Resident may not install or use a private reception device, such as a satellite dish, that does not comply with the technical specifications established by the Federal Communications Commission, including but not limited to, signal leakage, which interferes with delivery of the Service.
- h) **Landlord not liable for residents financial losses** – Landlord shall not be liable to Resident for any losses incurred as a result of day trading, e-commerce, or other financial transactions and activities engaged in by Resident over the Service. If Resident uses the Service to engage in any of these activities, Resident does so at Resident's own risk.
- i) **Landlord not liable for Internet content** – Landlord makes no warranties of any kind, either express or implied, as to the accuracy, completeness, timeliness, moral standard, or suitability for any purpose of the material available on the Internet. Nor shall Landlord have any liability for the content of the data transmitted and received on the Internet.
- j) **Collection and usage of personal data** - Resident agrees to provide personal information in the form of a current and correct email address and telephone number. This information will be used for the purposes of sending notices, reminders, and other information related to Internet service. Resident agrees that telephone calls and email from College Internet Connection therefore are a legitimate source of communications.

## **Troubleshooting and Support**

- 1) **Ensure that your Ethernet card is properly connected.**  
Most Ethernet cards have a light on them indicating network activity. Ensure that the light is on or blinking. If your card doesn't have a light or you can't find it, skip this step.
- 2) **Ensure that the operating system has properly installed the hardware.**  
Follow the Ethernet manufacture's manuals to ensure card is properly installed.
- 3) **Ensure proper networking configuration for DHCP. On some operating systems the option will be to receive your network settings automatically.**

#### 4) Call Technical Support

734-531-0148

**Note:** College Internet Connections, LLC is the vendor that provides the high-speed link to the Internet. Hardware or software problems associated with a resident's PC are the resident's responsibility. However, if you have a question about your connectivity, you may make an inquiry free of charge. Sometimes your problem may be solved quickly over the phone, but if a service call to your unit is required and the problem is not related to the landlord's equipment, a service charge will be charged to your apartment. Service charges begin at \$80.00 for the first hour and \$20.00 for each fifteen-minute increment thereafter.

#### Known P2P Programs

The following list is by no means exhaustive, but gives examples of software that is not allowed to be run on the network. Violation of this policy will result in a \$45.00 fine.

- |              |                 |                |
|--------------|-----------------|----------------|
| ●Limewire    | ●Morpheus       | ●BitComet      |
| ●Kazaa       | ●Bearshare      | ●BitToronado   |
| ●Acquisition | ●BitTorrent     | ●Foxy          |
| ●SoulSeek    | ●eDonkey/eMule  | ●Clubbox       |
| ●WinMX       | ●Direct Connect | ●Azureus       |
| ●Ares        | ●Piolet         | ●Bit Lord      |
| ●Skype       | ●Blubster       | ●coolstreaming |
| ●Shareaza    | ●Aimini         | ●shoutcast     |
| ●Veoh        | ●Kontiki        | ●peercast      |
| ●TVKoo       | ●TVAnts         | ●streamerp2p   |
| ●P2P VoIP    | ●IP - PPLive    | ●icecast       |
| ●uTorrent    | ●Thunder        | ●Sopcast       |
| ●QQLive      | ●QQ             | ●FlashGet      |
| ●Poco        | ●Net Transport  | ●Kugoo         |
